

1. WAP to print characters in even index?
2. WAP to print characters in odd index?
3. WAP to print first half of the string
4. WAP to print the second half of the string
5. WAP to print characters in even index in reverse order
6. WAP to print characters in odd index in reverse order
7. WAP to print first half of the string in reverse order
8. WAP to print the second half of the string in reverse order
9. WAP to print the characters present in the index which are multiples of 3?
10. WAP to print middle character present in a String?
11. WAP to reverse the string from the half?
12. WAP to remove spaces from a given string
13. WAP to remove extra spaces from a given string
14. WAP to remove vowels in a given string
15. WAP to remove all lowercase alphabets in a given string
16. WAP to remove all uppercase characters in a given string
17. WAP to remove all numeric characters from a given input String
18. WAP to remove all consonants from the given input string
19. WAP to remove all lowercase vowels from a input string
20. WAP to remove all uppercase vowels from a input string
21. WAP to remove all lowercase consonants from a given input string
22. WAP to remove all uppercase consonants from a given input string
23. WAP to remove all special characters in a given string
24. WAP to remove all alphanumeric characters from a given input string
25. WAP to remove all alpha-numeric characters from a given input string

26. WAP to count spaces from a given string
27. WAP to count extra spaces from a given string
28. WAP to count vowels in a given string
29. WAP to count all lowercase alphabets in a given string
30. WAP to count all uppercase characters in a given string
31. WAP to count all numeric characters from a given input String
32. WAP to count all consonants from the given input string
33. WAP to count all lowercase vowels from a input string
34. WAP to count all uppercase vowels from a input string
35. WAP to count all lowercase consonants from a given input string
36. WAP to count all uppercase consonants from a given input string
37. WAP to count all special characters in a given string
38. WAP to count all alphacharacters from a given input string
39. WAP to count all alpha-numeric characters from a given input string
40. WAP to print spaces from a given string
41. WAP to print extra spaces from a given string
42. WAP to print vowels in a given string
43. WAP to print all lowercase alphabets in a given string
44. WAP to print all uppercase characters in a given string
45. WAP to print all numeric characters from a given input String
46. WAP to print all consonants from the given input string
47. WAP to print all lowercase vowels from a input string
48. WAP to print all uppercase vowels from a input string
49. WAP to print all lowercase consonants from a given input string
50. WAP to print all uppercase consonants from a given input string
51. WAP to print all special characters in a given string

52. WAP to print all alphacharacters from a given input string
53. WAP to print all alpha-numeric characters from a given input string
54. WAP to count alphacharacters in a given string
55. WAP to count vowels in a given string
56. WAP to count the alphanumeric characters in a given string
57. wap to convert all lowercase characters to uppercase characters
58. WAP to convert all uppercase character to to lowercase characters
59. WAP to convert all vowels to uppercase
60. WAP to convert all consonants to lowercase
61. WAP to convert all all vowels to lowercase and consonants to uppercsae
62. WAP to print only the alphacharacters in a given string
63. WAP to insert "**ABC**" in place of spaces from a given string
64. WAP to insert "**ABC**" in place of vowels in a given string
65. WAP to insert "**ABC**" in place of all lowercase aplhabets in a given string
66. WAP to insert "**ABC**" in place of all uppercase characters in a given string
67. WAP to insert "**ABC**" in place of all numeric characters from a given input String
68. WAP to insert "**ABC**" in place of all consonants from the given input string
69. WAP to insert "**ABC**" in place of all lowercase vowels from a input string
70. WAP to insert "**ABC**" in place of all uppercase vowels from a input string
71. WAP to insert "**ABC**" in place of all lowercase consonants from a given input string
72. WAP to insert "**ABC**" in place of all uppercase consonants from a given input string
73. WAP to insert "**ABC**" in place of all special characters in a given string
74. WAP to insert "**ABC**" in place of all alphacharacters from a given input string
75. WAP to insert "**ABC**" in place of all alpha-numeric characters from a given input string
76. WAP to insert "**ABC**" in place of spaces from a given string
77. WAP to insert "**ABC**" in place of vowels in a given string

78. WAP to insert "**ABC**" in front of every lowercase alphabets in a given string
79. WAP to insert "**ABC**" in front of every uppercase characters in a given string
80. WAP to insert "**ABC**" in front of every numeric characters from a given input String
81. WAP to insert "**ABC**" in front of every consonants from the given input string
82. WAP to insert "**ABC**" in front of every lowercase vowels from a input string
83. WAP to insert "**ABC**" in front of every uppercase vowels from a input string
84. WAP to insert "**ABC**" in front of every lowercase consonants from a given input string
85. WAP to insert "**ABC**" in front of every uppercase consonants from a given input string
86. WAP to insert "**ABC**" in front of every special characters in a given string
87. WAP to insert "**ABC**" in front of every alphacharacters from a given input string
88. WAP to insert "**ABC**" in front of every alpha-numeric characters from a given input string
89. WAP to place all the Special Characters present in a String at end of the String?
90. WAP to print the duplicate characters from the given input String?
91. WAP to remove characters from the first String which are present in the second String?
92. WAP to find first non-repeating character in a given String?
93. WAP to print the first repeating character in a given input string
94. WAP to check if two Strings are created with same characters ?
95. WAP to check weather the String contains only numbers or not?
96. WAP to search a word inside a String?

Sample input: TRAINING

Sample output: TGRNAIIN(concatenate 1st and last Character and continue merging)

97. take only the even index values first and then odd index values

Sample input: STUDENTS

Sample output: SUETTDNS

98. represent odd index characters with its ASCII value

Sample input: STUDENTS

Sample output: S84U68E78T83

99. convert the vowels to UC if they are in LC and vice-versa...and append # symbol before Consonents

Sample input: AmaZonFoResT

Sample output: a #mA #ZO#n#FO#RE#s#T

100. WAP to find the missing number in given integer array of 1 to 100?
101. WAP to find the duplicate number on a given integer array?
102. WAP to find the sum of all even nummbers
103. WAP to find the sum of all the odd numbers
104. WAP to find the sum of all even index
105. WAP to find the sum of all odd index
106. WAP to find the product of all even nummbers
107. WAP to find the product of all the odd numbers
108. WAP to find the product of all even index
109. WAP to find the product of all odd index
110. WAP to finf the second smallest number in a given array
111. WAP to print all the pair of numbers whose difference is equal to the key value
112. WAP to find the mean of the given array.
113. WAP to reverse an Array ?
114. WAP to remove duplicates from the given array?
115. WAP to insert and delete elements to and from Array?
116. WAP to put even and odd elements of an Array in 2 separate Arrays?
117. WAP to sort the Array in Ascending order?
118. WAP to sort the Array in Descending order?
119. Sort an array using Selection Sort.
120. Sort an array using bubble Sort.

121. WAP to print the Kth smallest element in an given array.
122. WAP to print the Kth largest element in an given array.
123. WAP to print the common elements in the 3 sorted arrays.
124. WAP to find the first repeating element in an array of integers
125. Merge 2 sorted arrays into resultant sorted array (sorting after merging is not allowed).
126. WAP to print the all the sub-array who's sum is equal to the key.
127. WAP to print the all the sub-array who's sum is greater than the 2nd largest number.
128. Rotate the given array.
129. WAP to reverse an array without creating a new array.
130. WAP to find the sum of digonal elements in a square matrix
131. WAP to find the product of digonal elements.
132. WAP to Split an Array from Specified Position?
133. WAP to calculate Sum and Average of an Array?
134. WAP to increment every element of the Array by One and print Incremented Array?
135. WAP to find the number of non repeated/unique elements in an Array?
136. WAP to find the number of elements present in a Array?
137. WAP to segregate even numbers on left side and odd numbers on right side of array?
138. WAP to segregate 0s on left side and 1s on right side of array?
139. WAP to find the union and intersection of 2 Arrays?
140. WAP to print the odd numbers in an Array?
141. WAP to print the even numbers in an Array?
142. WAP to alter the elements of the 1D array in the given way.(if the element and the index of the element is equal then replace the element with 2)
143. WAP to alter the elements of the **2D** array in the given way. (if the element is equal to the row index replace the element with **0**, if the element is equal to the colum index replace the element with **2**,if the element is equal to the row index and column index replace the element with **0**)
